

There is no more appropriately named collection. The four tile designs that make up this collection can be configured to compose an almost infinite number of patterns. The graceful vine design and stone create classic elegance. Silver or gold leafing with optional Swarovski crystals applied to the vine brings the Flamboyant design to an even higher level of elegance.

As with most Giovanni Barbieri designs, Flamboyant is ideal for high-impact focal points. Color variation is slight however this is a hand finished product and will have some variations in surface presentation. Edges are slightly beveled. The Collection comes in 24" x 24" pieces.

Flamboyant is made from recycling marble dust production waste, reproducing faithfully the Natural Stone's beauty. It is suitable for any installation even where Natural Stone is not suggested. No maintenance. Not absorbent. UV color protection tested by laboratory.

Lead times from Italy can be 7-10 weeks
